

Authentic Maui Jim®

Prescription Sunwear

Forward your patents with the unmatched fit, style, comfort and protection that is authentically Maui Jim.

LENS AVAILABILITY

Maui Evolution® 1.60

• Neutral Grey, HCL® Bronze, Maui Rose®, and Maui HTM

• Single Vision and Progressive

• High abbe value for excellent optics and clarity

• Low specific gravity, lightweight and comfortable

• Outstanding scratch, impact and solvent resistance

• Available in most S and B base frames, including drill mounts

Polycarbonate

• Neutral Grey and HCL® Bronze

• Single Vision and Progressive

• Available in all S and B base frames, including drill mounts

TOTAL POWER AVAILABILITY

Total power is achieved by algebraically adding the sphere and cylinder powers together in minus cylinder form. The Maui Jim lab processes all orders based on the highest combined curvature within each prescription. The prescription axis is not a factor when determining total power.

Example 1 contains a plus sphere and a plus cylinder. (+3.50 +.50)

Step 1: Add the pluses together and change the sign of the cylinder value.

When transposed, +3.50 +.50 is equivalent to +4.00 -.50.

Step 2: Add the plus sphere value to the cylinder value. The resultant power is the TOTAL POWER of +3.50.

Example 2 contains a plus sphere and a minus cylinder. (+3.00 -.50)

Step 1: Algebraically add the cylinder value to the sphere value. The resultant power is the TOTAL POWER of +2.50.

Example 3 contains a minus sphere and a plus cylinder. (-4.50 +.50)

Step 1: Algebraically add the cylinder value to the sphere value and change the cylinder sign to a minus. When transposed, -4.50 +.50 is equivalent to -4.00 -.50.

Step 2: Add the minus sphere value to the minus cylinder value. The resultant power is the TOTAL POWER of -4.50.

Example 4 contains a minus sphere and a minus cylinder. (-4.50 -.50)

Step 1: Add the minus sphere value to the minus cylinder value. The resultant power is the TOTAL POWER of -5.00.

Maximum allowable thickness = 8mm
Maximum cylinder power = -3.00D

+3.00 to -2.50

-2.50 to -3.50

-3.50 to -4.50

-4.50 to -5.50

-5.50 to -6.50

NOTE: Fix measurements may vary slightly from plano sizes.

* Our Finest Fix styles have been assigned a new SKU number to differentiate them from their plano counterparts. While the overall shape of the Rx version is the same as plano, the construction is different. Some of these Fix styles are three piece mounts (brown bar has been removed), while others have longer posts or adjustable nose pads. The following chart indicates the specific styles affected.

Plano Rx	Plano Rx	Plano Rx	Plano Rx	Plano Rx
501	901	405	905	515
502	902	407	907	516
450	950	408	908	517
		409	909	518
		414	914	917
